DETAILED ACTION

1. This communication is in response to Applicant's request for reconsideration filed on January 18, 2004. Claims 34-51 are pending. The rejections cited are as stated below:

Claim Rejections - 35 USC 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless —
(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

3. Claims 34-51 are rejected under 35 U.S.C. 102(e) as being anticipated by Dent et al. US Patent No. 6,128,603 (hereinafter "Dent").

Applicant's disclosure page 28, second paragraph, states "Fig. 9B depicts screen 930 which can be transmitted from the CF station 140 to present summary bill related information at the payor station 120a-12d in a categorized manner. As shown, by clicking on indicator 935, categories of billers are changed in block 940. For example, in screen 930 the category been set to *unpaid bills* and accordingly, a summary of all unpaid bills appears on the payor display 460. Other categories could be, for example,

utility bills, paid bills, questioned bills, credit card bills or any other category which may be desirable under the particular circumstances.". Dent clearly teaches the steps of categorizing and organizing bills according to different categories such as paid bills, unpaid bills, and pending bills (figs. 5-7, and column 7, line 55 thru column 8, line 2).

Claims 34-51, Dent discloses a method and a corresponding system for electronically presenting bills, comprising the steps of storing a plurality of bills from a plurality of billers for a payor, each biller being associated with one of a plurality of biller categories, receiving, via a network, a request from a payor to view those of the stored plurality of bills from billers associated with one of the plurality of biller categories, and transmitting, via the network, only those bills from those billers associated with the one biller category to the payor responsive to the request (abstract, figs. 5-7, and column 7, line 35 thru column 8, line 2).

Dent discloses that each of the plurality of biller categories corresponds to a type of good or service provided by the plurality of billers, the plurality of biller categories includes a category corresponding to at least one of a credit card service, and a utility service, at least one of the plurality of billers is associated with more than one of a plurality of biller categories, the plurality of bill categories includes a disputed bill category, and defining at least one of the plurality of biller categories according to an instruction received from the payor (figs. 5-9, column 7, line 35 thru column 8, line 2, and column 10, line 60 thru column 11, line 42).

, Art Ùnit: 3624

Dent discloses the steps of receiving, via the network, a request from the payor to view those of the stored plurality of bills from those of the plurality of billers which are paid and associated with one of the plurality of biller categories, and transmitting, via the network, those of the paid stored plurality of bills from those of the plurality of billers associated with the one biller category to the payor responsive to the request (figs. 5-7, and column 7, line 55 thru column 8, line 2).

Response to Arguments

4. Applicant's arguments with respect to claim 34-51 have been fully considered but are most in view of the new ground(s) of rejection.
